

HOMEWORK

➤ Layout

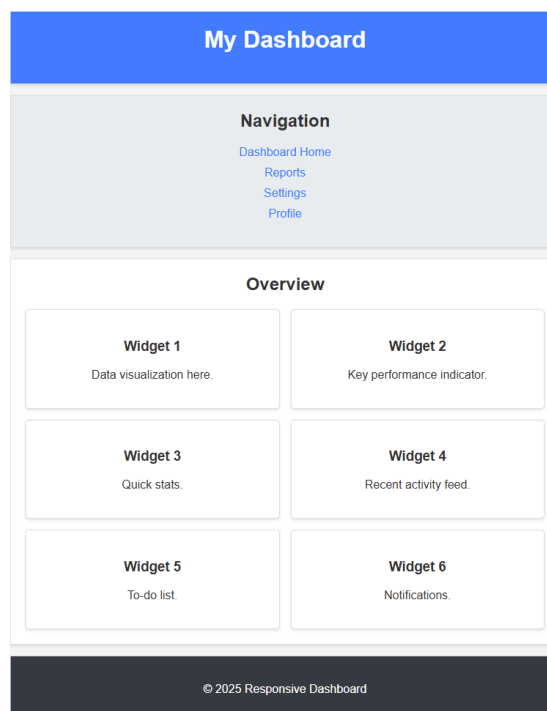

- Header
- Aside
- Main
- Footer

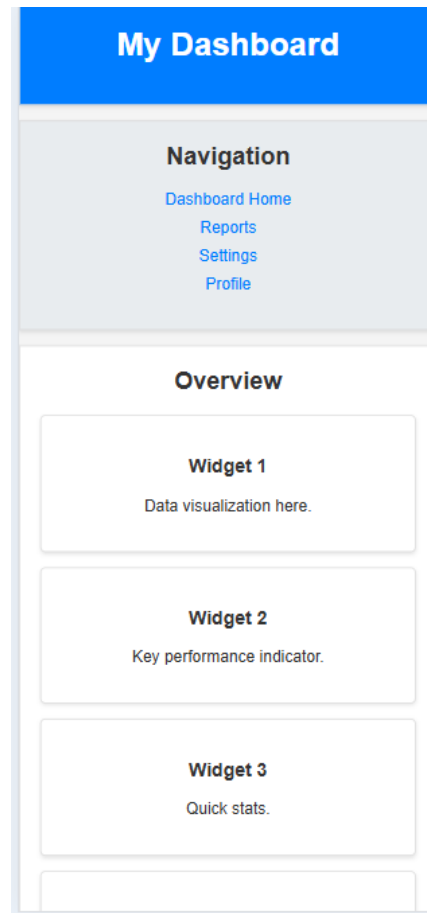

➤ In main contain:

- Dashboard widget. Inner dashboard widget, it has 6 widgets. Each widget has head(h3) and p accordingly.

RESPONSIVE. Breakpoint 768 px

- Breakpoint 480 px:

Tips code for breakpoint

Device screen > 768 px

Container:

```
Grid-template-column:250px 1fr;
Grid-template-row: auto 1fr auto;
grid-template-area:"header header"
                  "sidebar main"
                  "footer footer"
```

```
. dashboard-widgets {
  display: grid;
  gap: 15px;
  /* Define initial grid for desktop widgets here */
  grid-template-columns: repeat(3,1fr); /* 3 equal columns for widgets */
}
```

@media (max-width: 768px) {

```
.dashboard-container {
```

```
grid-template-columns: 1fr; /* Single column */
grid-template-rows: auto auto 1fr auto; /* Header, sidebar, main, footer */
grid-template-areas:
    "header"
    "sidebar"
    "main"
    "footer";
}
Min-height:100vh=> full height according to your device...
```

```
.dashboard-widgets {
    grid-template-columns: repeat(2, 1fr); /* 2 columns for widgets */
}
}
```

```
/* Mobile Layout (max-width: 480px) */
@media (max-width: 480px) {
    .dashboard-widgets {
        grid-template-columns: 1fr; /* 1 column for widgets */
    }
}
```

➤ CODE EXPLAIN

- Repeat(3,1fr)➔ make 3 column for 1 fraction
- Repeat(2,1fr)➔ make 2 column for 1 fraction.
- Min-height:100vh➔ To assure that the height is 100 % with your device screen
